

CHQ-WS2 Wall Sounder Tones & Volumes APPLICATION NOTE

This Application Note covers the CHQ-WS2, CHQ-WS2(WHT), ST-AWS-R, ST-AWS-W Wall Sounder

Description

The CHQ-WS2 Wall Sounder is designed to fit onto either a Standard Mounting Base (YBO-R/3(RED)) or a Short-Circuit Isolator Mounting Base (YBO-R/SCI(RED)). The CHQ-WS2 is an EN 54-3 Type A audible alarm device, or type B when used in conjunction with a weatherproofing kit (WS2-WPK or ST-AKWB-R).

EN54-3 Approved Tones

The following tables give the minimum sounder performance (dB(A)@1m) of each Tone when tested under EN54-3 test conditions. Figures are given for six horizontal and six vertical directions, measured when the

CHQ-WS2 mounting base is installed as shown in Fig. 1.

Mounting orientation with sensor alignment mark on base positioned vertically, at top.

Fig.1

NOTE: The sound pressure level (SPL) is dependent on current setting selected for the sounder, and also on the tone setting.

- CHQ-BS tone equivalents (in brackets): this is the tone that corresponds to the older version of Base Sounder CHQ-BS, and applies to the first 7 tones listed. The other tone patterns are new to the CHQ-WS2/ST-AWS-R sounder device.
- dB (nom): this is the nominal or target SPL level expected.
- Volume code: this is the volume code required to set the current level and overall SPL.
- Sound output: this is the minimum sound output that the CHQ-WS2 / ST-AWS-R sounder will produce, taking into account manufacturing tolerances, temperature and conditions of operation.
