Description

Model CHQ-SZM2(SCI) is a Single Zone Monitor designed to allow up to 6 conventional detectors to be interfaced to Hochiki's ESP analogue addressable system. The unit is also available as a DIN Rail mountable version; both modules feature an integral short-circuit isolator. The module utilises simple DIL switches for reliable addressing. A back box is also

available (CHQBACKBOX) which, when used in conjunction with the CHQ-SZM2(SCI), increases the IP rating to IP65.

The conventional zone on the module does not support any line continuity options; if Call Points are being interfaced they should be wired at the beginning of the zone.
