

O2T/FSp multisensor fire detector IQ8Quad with isolator, Nordic

Part-No.: 802385.N0

Same as 802385, but Nordic version.

Common technical data

Air humidity	< 95 %
--------------	--------

 All IQ8Quad detectors with built-in alarm devices and IQ8Alarm Plus can only be operated on the powered loop. For physical reasons, an increased sound level leads to a higher current consumption rate of the alarm device and the corresponding load factor must be considered when calculating the maximum number on the loop. Altogether up to 127 bus devices per loop can still be connected. Please consider that extra training is required when dealing with IQ8Quad with a built-in alarm device IQ8Alarm Plus. The training includes installation planning and commissioning techniques. For further information take a look at our training brochure. Information concerning the calculation can be found in the "Project Planning Support" chapter. Further data can be viewed in the accessories section for automatic detectors. For calculating the battery capacity of FACP, the detector data "quiescent current @ FACP battery" can be added. Special colors on demand!

 Programmed with 5 languages: Norwegian, Swedish, Finnish, Danish and English

Accessories:

767800
